Project Status Sharing Meeting

4 Project Status sharing Meeting

On November 23, A Project Progress Sharing meeting, of Project Titled "Grid Reinforcement using Scenarios Development

for Optimum Strategic Operation in 2040 (GRID2040)" was conducted.

The project is being supported by EnergizeNepal and is operational with the following objectives:

1. To perform technical analysis of the INPS in the status quo by developing simulation models.
2. To review the long-term plans of the development of Nepali power grid backed by technical analysis through simulation models.
3. To develop accurate loads forecast model.
4. To develop scenarios based on the historical source, load, transmission capability and meteorological data.
5. To develop optimum and reliable operating strategy backed by the technical analysis of the different scenarios.
6. To develop a customized analytical tool to study the impacts of the change in the generation, load and grid development scenarios in the overall operation of the power grid.
- 7.

Dr. Bishal Shilwal, Project Leader shared the recent progress of the project highlighting milestones achieved and next step forward.

ENEP Participated on Workshop

The team from EnergizeNepal Program participated in 3 days E-Mobility Workshop and EV Demo Launch Event on 23-25 November 2022 which was jointly organized by Clean Air Asia, Sajha Yatayat, Wuppertal Institute, UEMI, and Denmark Technical University as a part of SolutionPlus Project.
